## Mathews Company Announces the Launch of M-C Trax Remote Control

FOR IMMEDIATE RELEASE

Crystal Lake, IL – Mathews Company is excited to announce that remote control functionality is now available on the popular M-C Trax dryer remote monitoring system. Introduced in 2011, M-C Trax is a mobile app that has revolutionized the way users manage their grain drying operation. Building off the same innovative approach that led to the launch of the original system over 7 years ago, M-C Trax will now give operators the ability to remotely control their dryer's operation in a simple and secure manner. Available July 2, 2018, this new update will be available ahead of the upcoming Fall harvest in which tools such as M-C Trax are most utilized by our end-users and dealers.

M-C Trax Remote Control utilizes the same easy-to-use interface our users have come to appreciate from this app. Dryer settings can be changed instantly regardless of the end-user's physical location. The user can remotely shutdown or cooldown the dryer, change the discharge mode of operation, and change key set points such as: discharge speed, discharge moisture, mid-grain temperature, and plenum temperature(s) at any time during operation. Most importantly, security has not been overlooked as every remote change requires entry of a 4-digit PIN to ensure safe operation.

To easily upgrade all compatible dryers, Mathews Company has developed a short Tech Tip video that guides dealers through an easy step-by-step software update process, and also shows them how to use the new remote control functionality. As with all Tech Tip videos, you can find them on [www.mathewscompany.com](http://www.mathewscompany.com) as well as the Mathews Company [YouTube channel](#).

Joseph Shulfer, president of Mathews Company, commented on this latest update to M-C Trax. "This is the one of the greatest enhancements we have made to M-C Trax since its inception. We have taken our time to ensure a great user experience, making sure all remote changes are easy, instant and secure. This is designed to bring peace of mind to the farmer during harvest."

Headquartered in Crystal Lake, IL (U.S.A), Mathews Company has been a leading global manufacturer of high-quality innovative agriculture equipment since 1954, specializing in grain drying. M-C is committed to "Building for the Future," striving to provide superior products and unmatched service through innovation, expertise, and quality. M-C dryers are available through authorized dealers worldwide. The company's website is [www.mathewscompany.com](http://www.mathewscompany.com).
